Experience

Layer IQ

Strategic Advisor

Jun 2025 - Present

iXsystems, Inc.

Member, Advisory Council

Feb 2025 - Present

Hunter 23 Technologies

Founder/CEO

Mountain View, CA

Nov 2021 - Present

A trusted advisory to start up and enterprise companies specializing in strategy development, market analysis, program management and technical due-diligence in the enterprise IT market.

Groq

CTO, Public Sector

Nov 2022 - Oct 2024

- **Public Sector Strategy:** Led technology strategy and business development for public sector market entry.

Head, Enterprise Sales, Operations and Customer Support

Feb 2024 - May 2024

Advisor to CEO & CRO

Apr 2022 - Nov 2022

Veritas Technologies

Senior Advisor, Strategy & Corporate Development

Mar 2022 - May 2024

Lucata Corporation

Member, Board of Advisors

Sep 2022 - Sep 2023

MemVerge

Open Source Developer

May 2022 - Mar 2023

HighBAR Partners

Advisor

Mar 2017 - Mar 2022

Hewlett Packard Enterprise

Vice President & Chief Strategist, Hewlett Packard Labs

San Jose, CA

Nov 2019 - Nov 2021

- **Management:** Team of program managers and strategist to support research programs & projects.
- **Play to Win Strategy Development:** Disruptive Development, Aura Zero Trust Framework, High Performance Computing & Trustworthy AI strategies.
- **Governance Process:** Stage-gate model to manage disruptive research projects & existing programs.
- **Information Repository:** Automated and self-service BI based system for tracking programs & projects.
- **Advisory Board:** Created an executive level business & technical experts to advise on research activities.
- **Technical Career Path:** Chair of two division technical promotion boards. Member of corporate Fellow/Senior Fellow promotion board.

Vice President Strategy, Software Defined Datacenter

Sep 2016 - Nov 2019

- **Investments & Acquisitions:** Drove the acquisition of Simplivity, Quattro Networks and Plexxi. Created the partnership with Platform9.
- **Workloads as a Service:** Architecture that provided the ability for application workload execution brokering to the appropriate execution domain, across physical hosts, virtual machines or containers.
- **HyperConverged:** Devised multiple architecture strategies to enter the HCI market, finalized by the acquisition of Simplivity.

Vice President & Chief Architect, Converged Data Center

Mar 2015 - Sep 2016

Responsible for the technology direction for this diverse, rapidly growing business focused on combining hardware, software and cloud orchestration to build solutions for the next generation data center designs.

VMware

Palo Alto, CA

Chief Architect, Software Defined Data Center Division

Jan 2014 - Mar 2015

- **Business Development:** Application of virtualization in the automotive, IoT, industrial & entertainment markets.
- **Secure Thin Hypervisor:** Bare metal hypervisor for Cloud Native Application development & server management.

Chief Architect, Central Quality Engineering

May 2013 - Jan 2014

- **Management:** 500 person Global Quality Engineering team.
- **Capital Savings:** Company wide infrastructure inventory and reservation system that eliminated \$5M/year capital expense.
- **Predictive Analytics:** Tools that improved testing estimations, eliminated duplicative & identified testing gaps.
- **CQE Alignment:** Realigned System & Functional QA to development teams that improved production, increased collaboration & decreased duplication.

Chief Technology Officer, Platform Security Engineering

Mar 2011 - May 2013

- **Management:** 30 person Platform Security Engineering team.
- **Security Response Center:** Tools & processes to reduce likelihood of vulnerabilities & their impact to customers.
- **CVSS for Virtualization:** Revised scoring system that better categorized vulnerabilities.
- **Security Score Cards:** Engineering wide, consistent model to measure individual products against a common set of security objectives.
- **Security Education/Training:** World-wide engineering formal & informal training programs for 5,000 engineers.

Chief Technology Officer, World Wide Public Sector

Sep 2008 - Mar 2011

- **Business Growth:** Evangelism contributed to growing the US Federal business from \$50M to \$500M.
- **Cloud Computing:** Member of National Institute of Standards effort to develop SP-500 series.
- **IPv6:** Drove the prioritized implementation of IPv6 in products to meet US Federal requirements.
- **High Assurance Platform:** Moved the multi-level security domain system product from a customized hypervisor to a commercial version of VMware Workstation, including federal security assurance requirements.
- **Secure Hypervisor:** Led the development of a prototype of a highly secure bare metal client hypervisor. Client platform leveraged functionalities, scalability and stability of ESX while preserving device compatibility of a legacy desktop system.

Director of Engineering

Nov 2004 - Sep 2008

- **Management:** 70 person world-wide engineering organization working with OEMs and IHVs.
- **Partner Support:** Created a 3-tiered OEM & ISV support model that increased coverage of partners.
- **Certification Suite:** Automated testing suite that supports over 2000 servers & 200 storage devices.

- **Hardware Compatibility List:** Transitioned from static documents to a public facing database driven website.
- **OEM Preferred Operating System:** New versions of vSphere supported at release by all major system OEMs.
- **Security Certifications:** Achieved Common Criteria EAL 4 and FIP-140-2 cryptographic certifications.

United States Navy

Various

Naval Reserve Officer

Sep 1985 - Dec 2016

Led organizations from 25 to 1000+ personnel across multiple disciplines including surface operations, communications, computer technology, intelligence and security. Commanded 7 different units. Served on active duty from Aug 1986 to Mar 1990, Dec 2002 to Nov 2004.

Director of Operations and Planning, Naval Coastal Warfare Group One

Nov 2002 - Dec 2003

- **Operations:** In charge of operations for an organization of 2500 personnel involved in global antiterrorism operations. Directed and aligned the operations of 24 different commands in 7 states and one overseas location.
- **Budget Management:** Managed a \$30 million operating budget and a \$15 million capital budget to support simultaneous operations in two major operating areas.
- **Surveillance System:** Initiated the redesign of \$4 million surveillance system resulting in increased capabilities, reduced operating costs and increased overall system reliability.

Board Member, Secretary of the Navy's National Naval Reserve Forces Policy Board

2005 - 2008

Independent

Technical Editor

Apr 2001 - Jul 2004

Edited, developed and planned articles on technology targeted towards the home business market for Home Business Magazine. Magazine had a circulation of 65,000 newsstand copies and 22,000 paid subscribers. Developed concept and outline for a book on building home networks targeted at the software developer.

Independent

Software Development Consultant

Sep 2001 - Nov 2002

Early stage startup (SQU Systems) working on "Software Hot Swapping" technology to patch and replace sections of a running operating system. Effort was moved off-shore and shut down.

Compaq Computer Corporation

Palo Alto, CA

Director, Advanced Product Development

Jun 1998 - Sep 2001

- **Management:** Bi-coastal software engineering organization investigating techniques for continuous, dynamic, binary optimization of applications and systems based upon varied workloads.
- **Dynamic Optimizer:** Delivered prototype dynamic optimization system for Compaq's TRU64 UNIX.
- **Post-link Static Optimizer:** Led development of post-link optimization software tool for Alpha Linux.
- **Tool Integration:** Architect of project to integrate various performance and analysis tools into a common framework.
- **Digital Continuous Profiling Infrastructure:** Developed image manipulation library for Alpha Linux post-link time feedback optimization infrastructure.

Digital Equipment Corporation

Palo Alto, CA

Senior Engineering Manager, Advanced Development Group

1995 - 1998

- **Management:** Second level manager with groups of 20 engineers in Palo Alto, CA and Bellevue, WA. One group investigated performance impact of architectural and system design trade-offs against major applications. Bellevue group supported porting and optimization of Microsoft applications to Windows NT for Alpha.

- **NT-Atom:** Led the design, development and support of the NT-Atom Instrumentation and Analysis Framework Application product. Oversaw the release of 2 major and several minor versions.
- **Digital Continuous Profiling Infrastructure:** Developed image manipulation library for Windows NT (Intel and Alpha).
- **Database Benchmarks:** Coordinated efforts of corporate task forces to analyze and tune Oracle, Informix and Sybase TPC benchmarks.

Engineering Manager/Consulting Systems Engineer, Software Partner Engineering 1992 - 1995

- **Management:** Second level manager of department consisting of 5 managers, 80 full-time and contract engineers, involved in supporting the migration and co-engineering of applications to Alpha for OpenVMS, TRU64 Unix and Windows NT.
- **Cross Compiler:** Created experimental cross compiler for Windows NT/Alpha to allow early application porting.
- **Alpha Migration Centers:** Lead Windows NT engineer for 10 US Alpha Migration Centers. Ported 40+ public domain applications to Windows NT.

Technical Director/Program Manager 1990 - 1992

- **Business Development:** Developed sales leads, negotiated customer proposals, Statements of Work and contracts for consulting projects within the Federal Market. As Technical Director, responsible for \$4 million in service revenue.
- **EPA GIS System Integration Program:** Managed 10-person team developing all technical deliverables for the RFP, Live Test Demonstration and contract modifications for the successful \$140 million contract win.
- **CHAMPVA:** Managed software development team for Department of Veterans Affairs' \$2.5M custom document imaging system.
- **NASA Space Station:** Designed the ITV&E and Avionics Development Facility computer system for RFP and subsequent award.

Software Engineer 1983 - 1986

- **Decision Support Workstation:** Lead engineer developing a prototype multimedia, executive decision support workstation. Designed and built the calendar subsystem, security system (hardware and software), GUI subsystem, and the graphics applications library.
- **VAXLab User Management System:** Software for automating the management of VAX/VMS systems.
- **Laboratory Information Management Systems:** Developed the software and API library set for graphing data from various laboratory instruments in real-time.

Volunteer Efforts

Trustee, Naval War College Foundation	2018 - present
VMware Partner Advisory Board	2019 - 2022
Northeastern University, College of Electrical & Computer Engineering Advisory Board	2006 - present
National University, Cyber Security and Information Assurance Advisory Council	2010 - 2013
U.S. Secretary of the Navy, National Naval Reserve Forces Policy Board	2005 - 2008

Education

Joint Staff College at National Defense University	Jun 2004
Diploma (Master of Arts equivalent) in Strategy and Operational Planning	
United States Naval War College	Jun 1998
Diploma (Master of Arts equivalent) in National Security and Strategic Studies	
Northeastern University	Jun 1986
Bachelor of Science in Electrical and Computer Engineering
